Notes

1. Accounting policies

The accounting policies used in the preparation of the interim profit announcement are consistent with those applied in the previous financial year ended 31 August 2003, which were compliant with South African Statements of Generally Accepted Accounting Practice and International Financial Reporting Standards.

The announcement was compiled in terms of AC127/IAS34 – Interim Reporting.

2. Changes in comparative figures

A recent ruling given by the GAAP Monitoring Panel has provided more clarity regarding the consolidation of share incentive trusts. In light of this, the Group has consolidated the JD Group Employee Share Incentive Scheme and the JD Group Limited Share Incentive Trust in the current reporting period. Intercompany loan accounts have been eliminated and Group shares held by the trusts have been shown as treasury shares. Comparative figures have been restated.

In addition to the changes evident from the statement of changes in equity, the following amounts have been restated:

Earnings per share

Basic and diluted earnings per share were adjusted by the inclusion of the additional treasury shares held by the Group as a result of the consolidation of the share incentive trusts.

The recent release of the improvements to International Financial Reporting Standards has clarified that the International Accounting Standard Board only requires inventory (cost of sales) and trade payables (finance costs) to be adjusted for the benefit obtained from extended credit terms, where the terms are beyond the normal credit terms in the industry. The Group has therefore reversed the prior year provision regarding the imputed interest cost. The impact is as follows:

| | Cost of sales R million | Finance costs – net R million | Operating income R million | Operating margin % |

In accordance with industry norms, amounts due from instalment sale receivables, receivable after one year, are included in current assets. The credit terms of instalment sale receivables range from 6 to 24 months.

a. Classified as originated loans and receivables and carried at amortised cost.

b. Other provisions consist of provisions for extended guarantees, unearned club, insurance and collection fees raised on fair valuation of the Profurn closed branches.

Bank borrowings are secured by a negative pledge of accounts receivable.

5. Trade and other payables

Included in trade and other payables are the following provisions raised on the acquisition of Profurn:

| | Raised at acquisition R million | Audited 31 August 2003 R million | Utilised during current period R million | Reviewed 29 February 2004 R million |

| | 244 | 169 | 26 | 143 |

6. Trademark (provisional)

The excess of the purchase consideration made over the fair value of the net assets acquired from Profurn has been recognised as a provisional trademark. The fair values of these assets and liabilities have not yet been finalised. The Group has until the end of this financial year to finalise the fair values. Once this is completed and the trademark has been fairly valued, these provisional fair values may be amended with an adjustment to goodwill and deferred taxation where applicable.

Operating environment

The period under review was characterised by declining interest rates, low inflation and reduced personal tax resulting in an overall increase in consumer disposable income. The strength of the Rand caused the prices of our imported products to decline, making them more affordable. Sound and video products, all imported, experienced year on year deflation of up to 25%. These factors have contributed towards significant unit sales growth.

Financial overview

The results to 28 February 2003 ("comparative period" or "2003") do not include the results of the ex-Profurn Limited ("Profurn") stores, which were first consolidated from 23 April 2002.

Revenue increased by 95% to R4,7 billion (2003: R2,4 billion), with sale of merchandise increasing by 113% to R3,2 billion (2003: R1,5 billion). Revenue growth represents organic growth of 17%, the balance relates to the acquired businesses. Sale of merchandise constituted 68% of total revenue (2003: 62%), with the remainder contributed by finance charges, financial services and other services.

Southern African revenue contributed 97% of total revenue (2003: 93%). BoConcept®'s revenue increased by 5,1% in Sterling terms and Abra grew revenue by 22,3% in Zloty terms.

Credit sales accounted for 52,8% of total sales (2003: 72,6%), considerably lower than the corresponding period. This is attributable to the inclusion of Hi-Fi Corporation, the bulk of whose sales are for cash, and to the relatively higher cash sales in our other chains due to the higher levels of disposable income in our customer base.

Cost of sales rose to R2,2 billion (2003: R1,0 billion), which tracked the increase in the sale of merchandise of 113%. Notwithstanding the relatively larger portion of low margin business in Hi-Fi Corporation, gross margins at Group level were stable at 32% (2003: 33%). This was due to overall margin increases across all other chains.

Finance charges earned increased by 67% over the comparable period to R741 million in a lower usury rate environment. Financial services, which includes all the Group's insurance offerings, increased by 67% to R603 million. This combined contribution to revenue is relatively lower due to the lower credit sales volumes.

Operating expenses grew by 69% to R1,8 billion. Expenses in the southern African operations grew by 66%, by 18,7% in the UK and by 19,5% in Poland, in their respective local currencies. The increase in southern African costs was largely as a result of the acquisition of Profurn. Salary increases for union members, which are negotiated in terms of a two year agreement, were revised upwards by 7% in the period under review. The increases in European costs were largely due to the opening of new stores.

The amount of R188 million reflected under corporate in the segmental analysis includes expenses of R65,3 million relating to both historic and acquired operations which are of a non-recurring nature and therefore cannot be allocated to the individual chains without distorting the ratios.

Operating income grew by 124% to R684 million with operating margins improving to 14,4% from 12,6%.

Headline earnings increased by 140% to R452 million (2003: R188 million). Headline earnings per share rose by 63% after taking into account the 53,7 million shares issued for the acquisition of Profurn.

In comparison to receivables at the year end, net instalment sale receivables grew by 4,0% to R4,7 billion, while the deposit rate on credit sales increased across the chains. Total provisions as a percentage of gross instalment sale receivables were 32,6%, compared to 24,3% at the end of the comparable period and 31,9% at the last year end. The Group continues to insure its South African instalment sale receivables.

No write backs were made of any "at acquisition" provisions raised at the time of acquiring Profurn. The Group is in the process of finalising the fair values of the assets and liabilities acquired from Profurn and has until the end of this financial year to finalise the allocation of these acquisition values. Included in the balance sheet is an amount of R299 million as a provisional trademark. This amount will be adjusted to reflect the final allocation of the acquisition values, consequently, the income statement amortisation of the trademark (provisional) may require adjustment.

Bad debts written off increased from 2,7% to 3,3% of gross receivables. These write-offs were made across almost all chains and further enhanced the quality of the receivables book. Receivables in arrears represented 14,9% of gross receivables, down from 17,4% at the last year end. It is significant to note that the Rand amount of arrears reduced on an enlarged receivables book. The average length of the book in the historic operations declined to 14,7 months from 15,3 months at last year end.

Notwithstanding significant increases in sales, inventories rose only marginally since last year end.

Net gearing declined to 17,1% from 26,3% at last year end on the back of strong cash generation. The target gearing ratio remains between 35% and 50%.

Cash generated by operations increased to R469 million (2003: R42 million) as cash generated by trading increased to R745 million from R333 million in the comparable period. Cash utilised in the increase in working capital amounted to R276 million (2003: R291 million).

The number of account holders has grown by 4% to 1,89 million since the last year end.

Operational review

Morkels, Barnetts and Hi-Fi Corporation, the ex-Profurn operations, were fully integrated into the Group at the commencement of this financial year, allowing management to focus on extracting further operational efficiencies. The full overhaul and assimilation of these chains' outdated IT systems remain a challenge. This issue aside, great successes have been achieved in bringing the levels of operational efficiencies in these stores up to those of the historic JD operations. It is envisaged that outstanding issues will be resolved within the next 12 months.

All our chains achieved substantial revenue growth. Bradlows' results are impacted upon by the inclusion of the ex-Profurn stores that have been converted in the period, as well as the net reduction of four stores. On a like-for-like basis Bradlows' sale of merchandise increased by 15,9%.

Revenue growth combined with marked improvements in the operating margins contributed to robust operating income growth. Most notably Joshua Doore, Bradlows and Electric Express achieved margin gains. Since year end the ex-Profurn chains have also grown their margins, notably in Hi-Fi Corporation.

BoConcept®

No new stores were opened during the period as management focused their attentions on addressing the operational issues. Problems in the supply chain, discussed in the past annual financial statements, remain a challenge. Due to internal issues, Club 8, the BoConcept® franchisor, has been unable to comply with the supply level agreements entered into with our BoConcept® stores. Management is in the process of reviewing its options and a final decision regarding our investment will be made by the financial year end.

Abra

Much progress has been made since the end of the last reporting period. The store base has grown from 26 at last year end to 33. Of these, 30 are now making a positive contribution as opposed to nine of the 26 in the previous year.

The operating margin has improved to a negative 3,7% (2003: negative 6,7%). Our primary objective over the next period is to expand our store base and to focus on the development of our employees. We anticipate that by year end we will have grown our store base to more than 40 and we expect the chain will be at break even point.

Nedcor alliance

The number of in-store points of presence ("pop") has been maintained at 143. The alliance continues to follow a prudent approach in all product offerings to its target market. Progress has been made in ensuring a smoother and more efficient interaction between the in-store pops and the Nedcor infrastructure.

The Nedcor Group has indicated that they require until June/July 2004 to finalise their mass retail business model. A further announcement will be made in this regard in due course.

Strategic review and objectives

As a Group, we are engaged in a process of defining more clearly the market space in which each of our brands trade. Our intention is to minimise competitive overlap and to better understand our customers' needs. This process of differentiation has gained significant momentum.

After the very successful integration of Profurn, the focus is now on improving efficiencies. We remain committed to our stated strategy of diversifying our earnings through the provision of financial services and expanding our offshore operations.

Group prospects and outlook

The momentum of sales since the end of the interim period remains buoyant. All our brands continue to show real growth on the previous year. This performance is matched on the collections side of our receivables. There is every likelihood that these trends can be expected to continue for the foreseeable future as the growth of an economically viable middle class gains momentum.

The enhanced cash flow places the Group in the enviable position to pursue growth without the constraint of overtrading. Our optimism is tempered by the significant

threat that the strength of the Rand will jeopardise current employment levels and future job creation.

Corporate governance

JD Group complies with the Code of Corporate Practices and Conduct as set out in the King Report on Corporate Governance and the JSE Securities Exchange South Africa Listings Requirements.

Triple bottom line

The Group's commitment to support HIV/AIDS interventions, sound labour relations, enhanced skills training and the development of our people in an environment which allows employees to develop to their fullest potential, continues as scheduled. Black Economic Empowerment within our South African communities remains an integral part of the Group's strategy.

Directorate

Mr JHC Kok was appointed as an executive director with effect from 1 March 2004.
